

Shown with Volt® & Accomplish® Seating

Classroom

The award-winning and holistic SmartLink education system helped establish The HON Company as the industry leader in designing and manufacturing high-performance furniture for learning environments. In developing SmartLink, HON asked teachers, principals, and superintendents what they wanted from classroom furniture. Their answers: It has to be durable. It has to adapt to all grade levels and ways of learning. It has to help educators stay organized. And it has to work with new technology. This furniture system for learning environments supports different learning styles and pedagogy.
